If You Dream It

PERCIVAL

We Can Build It

We've partnered with world-class lab planners and architects to develop award-winning controlled environment solutions with unmatched levels of customization. If you have an existing space or want help designing a solution from the ground up, we're ready to collaborate with you to realize your research vision!

We Customize Chambers Like No One Else Can

Percival works with you to bring your research dream to life. These distinct company qualities set us apart in our industry and give us the unsurpassed ability to customize environmental chambers and rooms:

Our Collaborative Approach – Our team is skilled at listening, suggesting and reinventing until we achieve the perfect design that everyone involved can be proud of.

Our "Nothing-Is-Impossible" Mindset – We see obstacles as puzzles and enjoy the adrenaline rush of solving them. This mindset motivates our engineers. To them, anything is possible if it doesn't break the laws of physics.

Our Passion for Science – Nothing is more satisfying than helping our clients achieve their research goals and advance scientific discovery.

Our State-of-the-Art Facility – Our spacious manufacturing floor accommodates customized walk-in rooms and unique builds. We've also invested in cutting-edge technology to fabricate our own parts.

Our Fast, Flexible Building Process – Our long history and extensive experience have taught us how to test and adapt our products as we build, streamlining our process to be faster and more flexible.

Custom-Built Rooms for Any Space or Application

We engineer tailored walk-in rooms that fit your proposed or existing space and support your research goals. Nearly every aspect of our chambers can be customized to deliver an elevated design that fits your specifications:

Science-Backed Lighting – We provide the widest selection of specialized lighting for scientific research, featuring the broadest range of LED colors. This lets you choose spectral ranges that best suit your applications.

Flexible Configurations – We adapt our walk-in room design to your requested shape and size. As your lab or operation grows and changes, we can easily add more rooms and adjust your configuration.

At-Request Modifications – We can extend temperature and humidity ranges, add a CO_2 system, install modular walls or modify many of our standard systems. Tell us what you want, and we'll make it happen.

Discover What We Can Design

When our clients challenge us with projects never attempted before, we always rise to the occasion. Explore walk-in room projects that took our customization skills to new heights and learn more about our history of precedent-setting ingenuity.

Unrivaled Customization of Climate Control

Percival Clients Who Are Changing the World

Complete In-House Testing

From construction to testing and installation, we personally handle and oversee all stages of each walk-in room project. While some companies only test individual components or isolated systems, we completely assemble our rooms and test them as finished units within our facility before shipping. This enables us to test the product's full functionality as if it were already installed in your lab or production site and ensure it meets or exceeds all performance standards. We also invite you to join the process, bringing you into our facility upon request to evaluate the product, review test results and consult with our engineering team.

Experienced On-Site Installation

No matter your location, our highly qualified crew will be there to make sure your installation is a smooth process from delivery to handover. We put safety and quality first while remaining cognizant of tight construction deadlines. If any on-site challenges arise, our crew draws on more than 40 years of experience to adapt and find solutions. We're committed to excellence at every step from our hands to yours.

Contact Us for a Free Consultation

Whether you know exactly what you want or need assistance in shaping your vision, we'll listen and answer your questions. Give us a call or contact us through our website to learn more about how a customized walk-in room can help you achieve the best results for your research.
